

Spider
Model Spider

Spider is a round suspension lamp resembling an eye that can look into any part of the room. By adjusting the angle of the diffuser, the light beam emitted by the LED light can be directed towards any specific point. When installed on the different clusters available, it can create numerous lighting patterns, from functional to decorative, which can be dimmed at will. Now available in the new Terra finish and as ceiling light. In *Spider*, the simplicity of the looks underscores the versatility of its performance.
